SG / 18: average strokes gained per 18 holes from this distance. 3-Putt %: holes where the first putt was from this distance and became a 3-putt. Short / Long %: missed putts finishing short or long (excludes holed putts, may not total 100%). Avg Leave: distance remaining on missed putts. Within 10%: for 16+ feet, share finishing within 10% of start distance (a 30ft putt finishing within 3ft).

Benchmark Comparison

VS SCRATCH

Benchmarks compiled from Arccos, Mark Broadie (*Every Shot Counts*), Lou Stagner, Shot Scope, and PGA/LPGA Tour data. **Ahead** always means better than the benchmark, whether the metric is higher-is-better or lower-is-better. **Plays Like** is the handicap level whose benchmark is closest to your number.

Short-game benchmarks are shot-mix adjusted — each expected value is computed from the actual distances of this player's shots in that range. Two players (or two reports) will show different benchmark values if they faced different chips. Bands with fewer than 5 shots show "Not enough data yet."
